# A STORY OF SUCCESS

CREDENCE HIGH SCHOOL

## OVERALL QUALITY OF EDUCATION

The school opened in April 2014, and was inspected in the 2016-2017 inspection cycle.

The school focused in the first three years of operation on implementing its vision and establishing strong partnerships with parents. Leaders ensured students participated in international benchmarking tests, and use the analysis of the results to inform teaching and school improvement planning.

The school's first inspection in 2016–2017 recognised a number of strengths, including the establishment of learning centres in the Kindergarten (KG), the good provision for students' personal development, the good partnerships with parents and arrangements for health and safety.

The principal worked on establishing a senior leadership team that prioritised the recommendations in the inspection report. The whole school community worked on a balanced curriculum, and rigorously addressing the weakness in teaching, in order to raise standards.

In the next cycle of inspection, the overall quality of education provided by the school was judged as good. Teaching for effective learning, assessment and the implementation and design of the curriculum were all judged good.

A clear and strategic vision and action plan has been developed setting out long-term goals for the whole school community. The positive impact of leadership is demonstrated in the significant improvements across many aspects of school performance.

## KEY POINT

The establishment a strong senior leadership team focused on raising standards.

Clear strategic vision and detailed action planning setting out long-term goals for the whole
